

# INSTALLATION - WIRING

Possible example only.

Read spec stickers and wire labels  
for exact color coding.

# INSTALLATION - MOUNTING

- **Test the Light Strip before installing.**
- **Ensure flat surface for installation.**

## END CAP SCREW MOUNT

- Use the Screws to fix the Light Strip in place.

## MAGNET MOUNT

- Simply stick the back of the Light Strip onto a ferrous surface.

# INSTALLATION - MOUNTING

## HIGH-ADHESIVE STRIP

- Remove the protection film over the adhesive tape.
- Stick the back of the Light Strip onto a flat surface. Apply even pressure over the Light Strip to secure.

## POLE CLIP

- Clip the short end of the H-shape pole clip to the back of the Light Strip.
- Clip the long end of the pole clip to your metal rod of choice.

## SCREW MOUNT BRACKET

- Clip the opening of the brackets to the Light Strip, and stick to the assembly onto your surface of choice for test fitting.
- Remove the bracket, secure the bottom of the brackets to your surface of choice.
- Clip the Light Strip onto the brackets.
